

PATENT

**SIZING COMPOSITION FOR STAPLE GLASS YARN, PROCESS USING THIS
COMPOSITION AND RESULTING PRODUCTS**

Filed by: SAINT-GOBAIN VETROTEX FRANCE S.A.

Inventors: Patrick MOIREAU
Anne BERTHEREAU

ABSTRACT

The present invention relates to a sizing composition for glass yarns, especially in the form of staple glass yarns, comprising at least one fatty acid containing at least two ethylene bonds.

The invention also relates to a process for manufacturing staple glass yarns using said sizing composition and to the staple glass yarn coated with the sizing composition.
